- 6) ☐ Other:

Art Unit: 2838

1. The disclosure should be carefully reviewed and ensure that any and all grammatical, idiomatic, and spelling or other minor errors are corrected. For instance, in claim 26, last line, "." is missing.

2. Figures 1-3 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-16 and 23-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Cilluffo (U.S. Pat. No. 6,078,160).

With regard to claims 1-16 and 23-26, Cilluffo shows a circuit for coupling a power source (12) to a load (14) comprising all the claimed subject matter such as a main contactor (18, 42) in series between the power source and the load, a detector circuit (60) arranged in a conductive path that is parallel with the main conductor, a controller circuit (126) coupled to the main contactor and the detector circuit (see Figs. 6, 7).

Art Unit: 2838

4. Claims 17-22 are allowable over prior art.

None of prior art of record taken alone or in combination shows a discharge circuit having a conductive path coupled in parallel to the load.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Harasawa (U.S. Pat. No. 5,590,013), Christiansen (U.S. Pat. No. 6,054,891) and Rogers et al. (U.S. Pat. No. 6,091,223) also discloses circuits for coupling a power source to a load, each of which comprises substantial elements as recited in the claims of the invention.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew V. Nguyen whose telephone number is (703) 305-3415.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-1782.
